

BETTER TOGETHER MEANS BETTER SERVERS.

Intel® Xeon® processors
and Intel® server boards.

Performance. Quality. Reliability.

Are your IT choices
putting your business at
risk?

Get the stability of a real
server with Intel Inside®.

Intel® Server Products
bring quality, reliability,
flexibility, and support to
your multi-processing
environment.

A real server delivers real advantages — from keeping your systems up and running 24/7 with redundant power capabilities to the improved data protection of built-in error checking. And with the added benefit of remote server management, you can confidently grow your business using the flexibility of outsourced IT management. With a real server built on the latest Intel® Xeon® processor 3400 series, you have a solid foundation for the future.
